DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 15-21 and 29-36 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 29, "forming, on a surface of a substrate material, a barrier film comprising a monolayer of metal atoms, said metal atoms being selected from the group consisting of barium, strontium and cesium atoms, singly or in combination thereof" renders the claim indefinite. The specification, while being enabling for "forming a monolayer of metal atoms of barium atoms" (see specification page 12 lines 9-22, page 13 and page 14 lines 1-16), does not reasonably provide enablement for forming a barrier film comprising a monolayer of metal atoms in a combination thereof of barium, strontium and cesium atoms.
